Seller

Plug radio into Computer.
Set Com Port.
Then Click – **Read**.

The radio will send info and reboot.
The info for that radio is now in the software.

Go to Frequency and you will see what your radio default is.

UK we want to change to Band 0

Use the pull down to select the band you want.

Now **Write** back to radio.

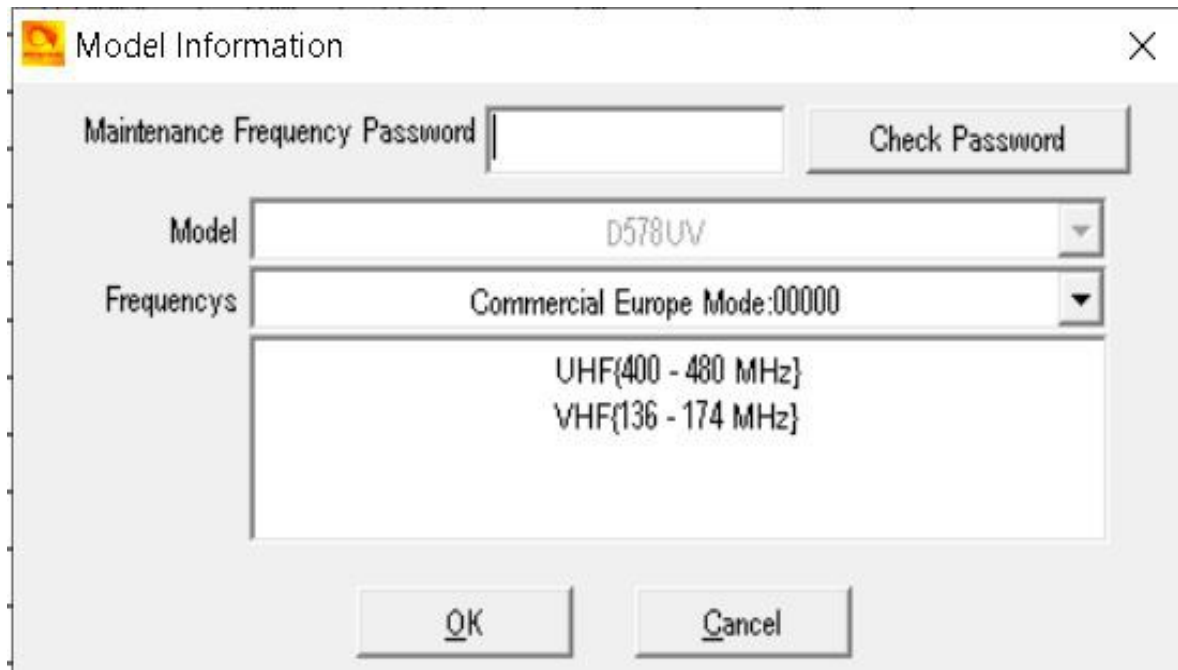

The screenshot shows the 'Anyone Options' software window. It contains several configuration fields and buttons. The 'Band Select' checkbox is checked. The 'Com Port' dropdown is set to 'COM4'. The 'Radio Type' is 'D578UV'. The 'Band Setting Password' is 'ÿ'. The 'Frequency' dropdown is open, showing 'Band 0 Rx:400-480 136-174 Tx:400-480 136-174' selected. The 'Serial Number' is '1909060170140005' and the 'Production Date' is '2019-9-6'. There are 'Read' and 'Write' buttons on the right side, and an 'Exit' button at the bottom right. A 'Dealer Information' section at the bottom contains fields for 'Dealer Code', 'Stock Date', 'Sell Date', and 'Seller'.

In the CPS – Model – Model Information

Make sure the Band displayed matches the same as you have now set the Radio to.

Options

1. Read the radio to the CPS and build your codeplug.
2. Via [Import CSV](#) rebuild your codeplug.

Remember to save this as your working Codeplug.

That is it.
