Digital Contact List - Download Tool [Anytone AdresTool](#)

The tool is used to download the CSV file

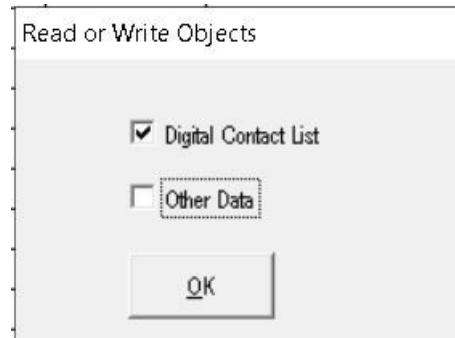

More info on this link <https://github.com/DMR-Database/database-tools/>

Open the CPS software and select the following:

- Tool (from top toolbar)
- Import
- Digital Contact List
- Select the saved database file

- Import (at bottom of page)
("Import Complete" message will appear)
 - Select the proper COM port
 - Program / Write to Radio / OK
- Check the "Digital Contact List" option / OK

When progress bar reaches 100%, radio will restart and you're ready to go.
