

If you own an Anytone D868UV, this is a download link to the latest [DMR ID database](#) formatted for your radio.

Display format

Open the software and select the following:

- Tool (from top toolbar)
 - Import
 - Digital Contact List
 - Select the saved database file
 - Import (at bottom of page)
- ("Import Complete" message will appear)

- Select the proper COM port
 - Program / Write to Radio / OK
- Check to "Digital Contact List" option / OK

When progress bar reaches 100%, radio will restart and you're ready to go.
